² refers to the Faculty of Pharmaceutical Sciences

 Agreed with the Council

 Prepared by

 date and signature of the Doctoral School Director

As part of the activities additional for the curriculum of the doctoral school - doctoral students may take free, certified training, courses and scholarships prepared by the Training and Conference Centre. The availability of training courses and detailed recruitment criteria are subject to separate regulations depending on the source of funding and the organiser.

The curriculum of the doctoral school was developed based on the conclusions drawn as a part of the so-called Salzburg Initiative II, published in 2010 and the Principles for Innovative Doctoral Training developed by the ERA Steering group and recommended in the Council conclusions on the modernisation of higher education of 28 and 29 November 2011. The content of the doctoral studies curricula is in accordance with the European Charter for Researchers.*
